

# Digisign™ ID BASIC/ENHANCED

When we send information via the Internet, the information travels from computer to computer until it reaches its destination.

Along the way, every computer in between has the opportunity to look at what's being sent. If you're sending confidential information, there is a greater need to ensure your communication is not intercepted and tampered by unauthorised people.

# Digisign™ ID BASIC/ENHANCED

DIGISIGN ID BASIC/ENHANCED allows end-users to conduct safe financial transactions, e-commerce and other security critical services online. It enables a reliable mean of authenticating your clients online compared to using the conventional username and password mechanism. DIGISIGN ID BASIC/ENHANCED can easily be integrated in your existing online applications (e.g. online banking, stock broking, e-procurement etc).

#### *Token Based User Authentication Technology*

DIGISIGN ID BASIC/ENHANCED are personal digital certificates stored on a smart card or floppy disk. The digital certificates contain specific information of the user that will be used to verify the identity of your customers.

#### *Strong Authentication Procedures*

DIGISIGN ID BASIC/ENHANCED subscribers will be verified by DIGICERT using a stringent verification procedure. Our verification procedures conform to the accepted international standards.

#### *Legal Protection with Digital Signature*

DIGISIGN ID BASIC/ENHANCED allows users to sign digitally. The digital signature is equivalent to a hand written signature used in conventional contracts, bank transaction forms etc. Provisions under the Malaysian Digital Signature Act 1997 and the Digital Signature Regulation 1998 enable the digital signature to be admitted as evidence in court.

#### *Peace of Mind*

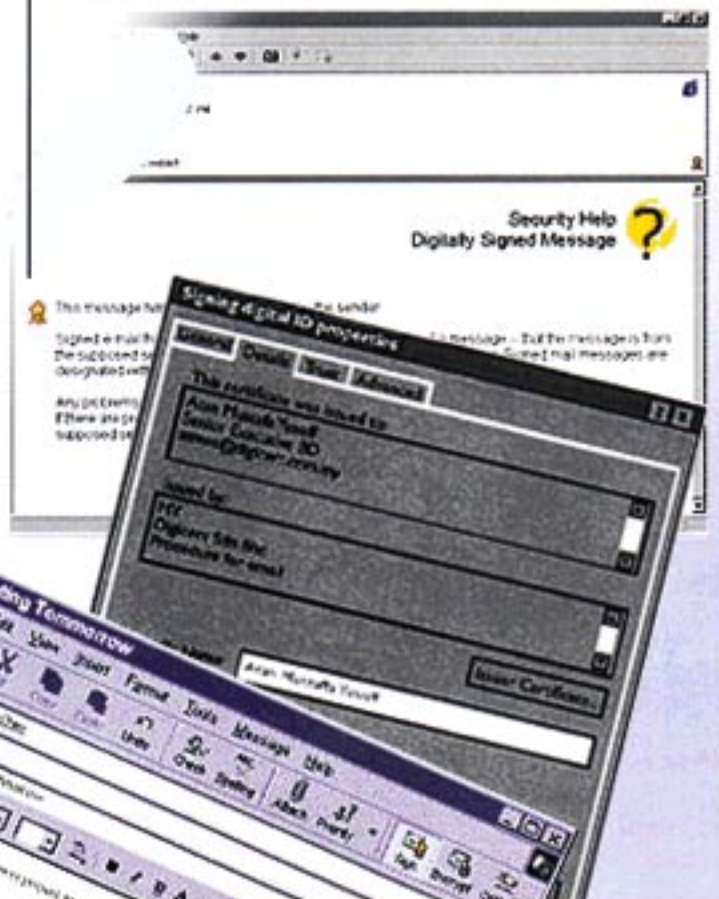

DIGICERT offers a reliance limit (liability) for each certificate issued for the unlikely event of improper verification on the certificate subscriber.

#### *Affordable*
